

Data Handling

What UnifiedArc collects - and, importantly, what it does not.

What UnifiedArc collects

Resource metadata, security findings, compliance assessment results, and cost and usage insights.

What UnifiedArc does not collect

Application source code, customer application data, database records, or application content.

Configuration, not content

UnifiedArc analyzes cloud configuration and security posture. It is not designed to inspect business application data.

UnifiedArc supports compliance readiness and assessment activities. It does not certify or guarantee compliance. | unifiedarc.com
